Café Purist

Water makes up 98% of a cup of coffee and matters a lot in majority to make a more aromatic and delicious coffee.

Caware Café Purist solutions include Shotsest Formula, Shots Formula & Crema Formula, which help customize the water for coffee and optimize the aroma taste of every cup of coffee.

Shotsest Formula

Caware Shotsest Formula effectively manages carbonate hardness levels while providing superior water softening for a sustainable and extended lifespan.

By utilizing bypass settings to create peak performance, Shotsest is an excellent choice for large-scale coffee brewing

Caware Shotsest - Brewing coffee for a sustainable and vibrant lifespan!

Shots Formula

Caware Shots Formula implements multiple filtration processes which reduces hardness & alkalinity and subsequently softens the water.

By optimal water softening, Shots Formula also enhances its suitability to protect machines from lime scale inhibition & corrosion.

Caware technology brings you the ultimate recipe for coffee

*Longer Lifespan
Water Softening
Chemical Reduction
Particle Reduction
Carbonate Hardness Reduction*

Crema Formula

Caware Crema Formula meets the standards by balancing the Magnesium to Calcium ions & by a ration of 3:1.

By enriching Magnesium in exchange for Calcium, Crema formula aids the extraction of fruiter flavor of coffee and bring more aroma.
